Best Practices of the Institution (2021-2022)

Best Practice No.1

Title of Practice: "Birds conservation through Artificial Birds" Nests and Provide Feedings.

Goal: A bird's population are currently declining due to pollution, cutting trees and hunting, etc. In order to increase the population of birds and conservation of these species to provide nests, and to make artificial bird's nests and placing them at various places (trees) in around the Seloo city and providing feeding (grains) to them.

The context: The house sparrows that one's chirped around in large numbers are now spotted rarely. It is due to high rise buildings, lack of greenery and radiation from cell phone towers. There is a shortage of feed too as agricultural land has been replaced with buildings. Such changes affect the breeding efficiency of the birds which results in declining their number.

The Practice: In order to increase the population of birds and providing nesting, our institution has carried out a project with the help of NSS students. In the last year hundreds of artificial nests have been placed on the trees of around the Seloo city. For this practice financial resource was generated from various sources such as Rs.20,000/- and Rs.15,000/- was collected from the staff members and selling of old newspapers, respectively. Students and staff collected the food grains which are used to feed the birds at specific feeding places.

Evidence of Success: Through this practice, birds population are increased by getting artificial nest, our Zoology department is monitoring to this practice to maintain their population by giving them food regularly with help of staff, NSS students and Alumni Association. Our Zoology department got award of appreciation from Nagar Panchayat, Seloo and Nature Conservationists.

Problems faced: The main problem of this practice is financial support, it needs lots of money to make artificial birds nest, suitable place to put it, and daily monitoring. Our college gets very less time to monitoring theme and feed them regularly. But due

to all problems, we created a committee to monitoring and feed regularly as well as to solve the financial support by the cooperation of staff and Alumni Association.

Annexure III

Best Practices of the Institution

Best Practice No.2

Title of Practice: Students participation in Co-Curricular Activities

Goal:

The main goal of this practice to motivate student in their subjects, understand that every success story has a great background, hard work, pain, struggle, glory, personal satisfaction and reward, improve the communication skill, debate, quiz, writing talents and group discussion, develop the concept of event management, emulate the great leader and rededicate for the subject, to maintain our great culture through celebration of important days.

The context:

During the Course of study and class room teaching of various syllabi, the students come across the names of famous scientists, thinkers, philosophers and other eminent personalities and some special days, As a part of their syllabus the students do not study about their life history, their contribution towards the subject, their inventions, application of their inventions, and the recognition or awards they received for their contribution. Of course few of the students approach the teacher regularly for these details. In general, it is not so, among all the students. The teaching faculty in their meetings, decided that in addition to the celebration of the Birthdays of great National leaders, the birthdays of these Scientists, Philosophers and other important days celebrated by the students themselves with the guidance of the staff. The staff felt that if such activities are not encouraged, the student may not know the contributions of the persons, the struggle they have undergone in achieving success or his or her life history and importance of culture through the celebration of days.

Practice:

Vidyabharti College, Seloo has been celebrating the birthdays of National leaders like Mahatma Gandhi, SavitribaiFule, AbulKalam Azad, Swamy Vivekananda Dr.BabasahebAmbedkar and other prominent personalities every year. Various departments and college level committees celebrate the birthdays of famous personalities and important days pertaining to the subjects in the following way.

A week before the date of birth, the concern departments and committee send an invitation to different departments and various committee conveners inviting students to participate in the program. The students of concern departments take lead in the management of the event. The prominent events in the agenda are: an invited talk, speech about the contribution of the Scientists/Philosopher and the thinkers, quiz program, group discussion, prize distribution. The students take part with great interest and are motivated in these programs.

Evidence of Success:

1. Students request for more & more program in each subject.
2. Students and the faculty are getting motivated and to celebrate these birthdays, as they celebrate the birthday of their kith and kin.
3. As the program is organized entirely by the students they are simultaneously exposed to the event management techniques.
4. The development of a scientific temper and positive thinking is worth noting in the students.
5. Achievement in life is envisaged in these programs.
6. Students are made to learn other concepts, which are supplementary to their routine subjects.

Problems faced:

The main obstacle, being a government aided college, is finance. The attitude of the administration is favourable to pursue this quality adopted to enhancement and extension activity. More departments are overcome them coming forward with these types of proposals. Main obstacle is finance and government audit procedures. As the celebration involves prizes, photos, banners and minimum refreshment, a sum of Rs.900/- is very much essential. No guidelines are available and the head of the institution is asked for remarks during audit for these activities. However the staffs contribute voluntarily in addition to the college contribution to make the program successful.

Annexure III

Best Practices of the Institution

Best Practice No.3

Title of Practice: Socio-Cultural awareness programme

Goal:

The main goal of this kind of activities is to create interest about social work among the society ,by organizing student it lead team building which help to create leadership quality among the student and by taking part of this kind of activity it enhance the communication skill also help to conserve the rural culture.

Context:

In this modern era the Indian culture is disappearing day by day because of lack of communication among society so the consequent is to affect the society and thinking. Culture is a sphere revealing the human evolution. A human being cannot exist in an uncultured environment. Culture as an effective social power has always come under the spotlight. In specific areas of research the cultural status is mostly related to creative activities; however it may also be researched in the sphere of education, promotion and expression of sociality. One of the most important roles of community centres is developing social intellectuality of individuals. Culture centres are not formal centres of community education, but at an informal level they can fulfil their functions successfully. The activities of the culture centres are needed for communities. The aim is to continuous education of the community members by analyzing how fully the culture centres realize their functions when implementing the goals put forward by the community

Practice:

The Principal of the college has appointed two faculties (Dr.Abhijeet N. Patil and Dr.ShasankNikam)and student to run these activates. Every year different type of activates organized by the committee under the mentorship of teacher, the awareness activates run in every nook and corner of villages. Yearly feedback collected in form of photo from respective team member.

Evident of Success:

Through this practice, plantation and conservation of trees is made by the students as well as rural youth. Organizing various sport competition on village and block level among various group, to organize various program like 'Run clean India movement' and celebrates various folk festivals like 'Pola Festival', 'Ganesh Festival' and so on. Through such types of activities students and rural youth get orientation of the personality, responsibility, values and confidence to their overall development.

Problems faced:

During these activities, we face some problems as lack of full cooperation form student side and rural youth; Our College gets less funding to promote this practice. The proper time management and coordination is not done. The major issue is that the less participation of rural youth and less interest as well as knowledge of various games.

Best Practices of the Institution

Best Practice No.4

Title of Practice: Free Uniform, notebooks, bags distribution

Goal:

Poverty and economic deprivation are main factors that are responsible for some student's less attendance, non-involvement in Institutional activities and inferiority. Some students in rural areas are economically sound but they spend lot of amount on education every year so they don't afford to spend money on their Uniforms as well as other educational aids. The purpose of this initiative is to make education accessible to larger number of students coming from poor economic backgrounds. Our institution always wants to help such students who are not economically sound.

The main objectives of our Institution to distribute free uniforms and bags are....

1. To bring equality among the students of our college.
2. To promote students to increase their attendance, regularity and participation.
3. To help their families from economic stress.
4. To maintain discipline among students.
5. To encourage the students in their studies.
6. To promote students in sports and other extra-curricular activities.

Context:

India's higher education system is the third largest in the world. We cannot deny the fact that even today, a huge part of India population resides in rural India. Residents of rural India usually come with little income sources which are usually consumed in basic survival, making education out of their realm. Students in rural areas of our country still facing numerous barriers to accessing basic as well as higher education. These main barriers are like costly educational books, notebooks, traveling expenditure,

increasing fees, college uniforms etc. Major Universities have taken strides by reducing college and exam fees, but other significant expenditures like College Uniform, sport uniform, educational aids etc. remains as it is. Due to economic problems and inferiority faced by rural students they may remain deprived of the essential facilities like sports education, extracurricular activities etc. One of the most serious problems is that the number of college dropouts, which are increasing in these areas. Such type of practice may help these students to improve their overall development and make their future bright.

Practice:

The admission committee of college, during admission process of first semester finds out the economically poor students, listed them and distribute unstitched uniform materials. Sometimes students who cannot afford educational aids approach to us, we register their names and give them notebooks free of cost. Our institution also promotes and encourage to the topper students of their class by providing them College Bags. Department of sports also provides free sport uniforms to the students who excel in sports.

Evident of Success:

Due to this practice 110 students get benefited by different sources like uniform materials, notebooks, bags or sports uniform etc. and they are excelling in their overall performance in college. These beneficiary students felt confident whenever they approached us. There was no any complaint from their families regarding expenditure on education.

Problems faced:

During this practice the main problem was economical, as there was less fund to run this practice. Some economically sound students also approached and demanded for such facility.
